Annulment of a mistaken operation prior to the summarizing of the receipt;

Input/output of amounts from the cash register by the manager;

Accounting of the cash;

Number of digits of the fiscal registers:

Digits after the decimal point - 0 to 3;

Input values - 999 999 999;

Programmable prices - 999 999 999;

Display - 9 999 999 999;

Daily total - 9 999 999 999;

Grand total for a specific period - 999 999 999 999;

Operator passwords, operational modes - 999 999;

Communication capabilities and networking of the CRWFM:

Port RS-232 – interface for bar-code reader and electronic weighing scale;

Port RS-232 – interface for personal computer (PC):

* Programming of new article codes and parameters of the CRWFM;

* Output of the accounts and electronic control tape from the cash register by means of a personal computer;

* Request for article code, article quantity, payment code, summary, etc.;

Printer

Uses a thermal printer APS MP 205;

Tape width – (57,5 ±0,5) mm;

Number of digits per row – 24 symbols;

Printing speed – 8 rows/sec.;

Maximum diameter of the roll – 50 mm;
Operational life of the printing head – 50 km of tape;
Operational life of each printer head thermal element - 100 million impulses;
Capability to print double width symbols;
